

Reminder Management System.

Reminder management system is a generic application which will be hosted on a server and there will be multiple users. The application is going to add “Groups” of contacts (Mobile nos) and do add delete edit operations on group, after creating “Group” system will allow to create next reminder date (Eg: 30 Days 60 Days, 90 Days), the “Group” will receive two Text message on their mobile phones 1st before 10 days and 2nd on the date selected by admin.

Page1: This is a login page where user will enter User_ID and Password.

Page2: This will be home page, here the upcoming 10 days reminders will be shown

Page3: This will be the Contact_Master page, here all groups will be displayed and admin can perform addedit delete operations.
